sahilghangash950@gmail.com | 7496899844 | 501 SAS Nagar Mohali

Portfolio

EDUCATION

Kurukshetra University   kurukshetra

B.Sc. Computer Science   July 2017 - July 2021

CGPA: 7.5

EXPERIENCE

Freelance | Full Stack Web Developer   Panipat , India | Jan 2019 - Aug 2022

Hello Sahil! I'm a self-taught full-stack developer with 3+ years of experience in web development. My journey began during college when I and a friend started a startup, prompting me to delve into HTML, CSS, JS, and PHP. Since then, I've transitioned to the MERN stack. While freelancing, I have contributed to TechTip24, specializing in live sessions and consultancy services for individuals aspiring to pursue careers in Data Analytics, Business Intelligence, and Data Science using various tools and technologies. The challenges of freelancing can be frustrating, but the satisfaction of overcoming them is unparalleled.

Appwrk | System Engineer   SAS Nagar Mohali , India | Oct 2022 - till now

I am responsible for creating reusable UI components in **react** and APIs in **node/nest js**. Demonstrates proactive client engagement by comprehensively grasping their needs and delivering customized solutions. Excels in establishing clear communication channels to ensure client satisfaction and drive successful project outcomes. Adept at navigating client requirements with precision and finesse to achieve optimal results.

Tools / Platforms:	Git, Github, Vs Code, Azure, SSMS
Databases:	MsSql, MySql, Azure Storage, MongoDb (Basic)

PROJECTS / OPEN-SOURCE

Unilever BY Reports | Link   *React JS, React-Redux, .Net, MS Sql, Azure Auth*

- The project aims to develop a user-friendly website for managing warehouse management systems.
- The website will have a fast and efficient interface to help users easily run queries and access data from the database.
- Additionally, users can export the data into Excel files for their convenience.
- I worked on this project in Appwrk It Solutions.

Unilever Boiler Hub | Link   *React JS, React-Redux, Nest JS, MS Sql, Apex Charts, Azure Auth*

- Boiler Hub is a portal that provides a data fetching and processing platform based on React and NestJS(NodeJS framework); user-friendly charts are implemented in the portal for better data visualization.
- It is a faster, quicker, and much more efficient portal where charts are used for better UI purposes.
- I worked on this project in Appwrk It Solutions.

Mesha | Link   *Next JS, React-Redux, Node JS, PostgreSql*

- Mesha enables users to manage all of their financial operations in one place.
- With Mesha, users can make worldwide payments, set reminders for upcoming payments, exchange tokens, and conduct cryptocurrency transactions with ease. With this web application, users can utilize a single dashboard for managing business operations across various countries, banks, and service providers more quickly and easily.
- I worked on this project in Appwrk It Solutions.

TechTip24 | Link   *PHP, Laravel, Javascript, Css, Razorpay*

TechTip24 provides Live Interactive Sessions and Live Consultancy Services to the respective candidates who want to build their career in Data Analyst, Business Analyst, Business Intelligence, Data Science kind of profiles using multiple tools and technologies.

MERN Social | Link   *Tailwind Css, ReactJS, NodeJS, MongoDB, ExpressJS, React-Redux, JWT, Axios*

This is a clone projects in which I have tried to copy instagram design and some functionalities. This is developed by using MERN technology. Some of the feature of this react app is adding a post , update post , delete post , like post , save post , comment , authentication system using JWT , edit profile , follow a user and explore section etc.

E-commerce - NextJs | Link   *NextJS, ReactJS, NodeJS, Sanity, Stripe, reactContext*

This is an e-commerce website. This is developed by using MERN + NEXT js technology. Some of the features of this next app are routing, adding to the cart, updating the cart, product details page, and checkout using STRIPE, etc. Feel free to check out the full functionality. For payment press 4 and 2 multiple times as test card credentials.

RealTime Chat | Link   *MaterialUI, NodeJS, ReactJS, MongoDB, react-redux, socket.io*

This is a real time chat application. This is developed by using MERN + Socket.io . Some of the feature of this react app is routing, login/register , view profile , create chat , real time messages and notifications etc. Feel free to check out full fuctionality. You can also login with Guest Users to save your time.

TicTacToe | Link   *HTML, CSS, ReactJs*

This is a simple tic tac toe game which we must have palyed sometime in our childhood on paper. This is built by using React js and simple css. This app has results like win/loose and Tie. And also theme functionality - Light/Dark
